German Cathodic Protection

Possible measurements:

- earth resistance measurement with 3-pole,4-pole method
- selective earth resistance measurement with clamp (no influence from parallel earths; no opening of rusty junctions is needed)

- two clamps earth resistance measurement without auxiliary test pros
- earth resistivity measurement

MRU-120 allows to take the measurements of:

- earthing resistance using auxiliary electrodes
- earthing resistance using auxiliary electrodes and clamp (for measurements of multiple earthing)
- earthing resistance using double clamps (for measurement of earthing when it is impossible to use auxiliary electrodes)
- ground resistivity (Wenner method)
